## Quick Turnaround Time for Installation of **AWC ODIN Care** for Minnesota Assisted Living Facility

### PROBLEM

A new nurse call system was needed and it needed to be installed as soon as possible.

### SOLUTION

The **Advanced Wireless Communication** team was on site in less than 3 days from request. They installed an **Advanced Wireless Communications** ODIN Care Nurse Call System to work in conjunction with their pre-existing nurse call stations and staff two-way radios.

### RESULT

Improved staff productivity with an enhanced communication platform which provided real-time reporting to address future state requirements.

### STORY

Nurse call systems are vital to making sure residents receive the care they need, when they need it. Every second matters and could mean the difference between life and death. So when a nurse call system fails, residents are at risk.

A Minnesota based assisted living facility experienced the hardship of a faulty nurse call system and were in need of a solution, fast. The **Advanced Wireless Communications** installation team was able to organize and install an **Advanced Wireless Communications** ODIN Care Nurse Call System, in under three days from initial request, to ensure that patient care and safety were promptly re-established. The new system works with their pre-existing call boxes and two-way radios to enhance staff communication and productivity while providing real-time reporting.
